

COTTONWOOD CANYONS CONSTRUCTION PROJECT MAP

Projects Legend

1 S.R. 210: High-T Installations
MP 9.5-9.9, MP 10.6-10.8, MP 11.5-11.8
August-October 2020

2 S.R. 210: Merge Lane
MP 3.8-4.2
July-October 2020

3 S.R. 210: Emergency Mudslide Repair
MP 5.2-9.9
August-October 2020

4 S.R. 210: Grit Mill
MP 4.3-4.5
August-October 2020

5 S.R. 210: RACS Installation
Toledo and Emma Ridge areas
June 1-October 2020

6 S.R. 190: Paving
MP 8 to Brighton Circle
June 24-September 2020

7 S.R. 190: Pedestrian Crossing
MP 10 to Cardiff Fork
July-August 2020

Other, non-UDOT affiliated project:

8 S.R. 210: Dominion Energy Pipeline
Snowbird Entry 4 to Albion Basin Road
Summer 2020

COTTONWOOD CANYONS SUMMER 2020 CONSTRUCTION

There will be seven UDOT construction projects in the Cottonwood Canyons this summer, a majority of which will be in Little Cottonwood Canyon (S.R. 210). See below for the specific project details, impacts, locations and time frames.

1) S.R. 210: High-T Installations, PIN: 17985

UDOT is installing three High-Ts to improve merging in bottle-neck hotspots. Installation will be at Snowbird Entry 1 (milepost 9.5-9.9), Snowbird Entry 4 (milepost 10.6-10.8) and Alta Wildcat (milepost 11.5-11.8). Working hours are Monday through Friday during daylight. Travelers should expect lane restrictions and moderate delays.
Construction Time frame: August-October 2020

2) S.R. 210: Merge Lane, PIN: 17986

A merge lane will be constructed as an addition of continuous movement from S.R. 209 to S.R. 210 at the mouth of the canyon from milepost 3.8-4.2. Working hours are Monday through Friday during daylight. Travelers should expect lane closures, restrictions for cyclists/pedestrians and moderate delays.
Construction Time frame: July-October 2020

3) S.R. 210: Emergency Mudslide Repair, PIN 17994

A continuation of the 2019 mudslide repair work including slope repairs and drainage improvements, from milepost 5.2-9.9. Working hours are Monday through Friday during daylight. There will be a temporary signal installed to alternate traffic. Travelers should expect lane closures, restrictions for cyclists/pedestrians and moderate delays.
Construction Time frame: August-October 2020

4) S.R. 210: Grit Mill, PIN: 14944

UDOT is working with the USDA Forest Service to install a parking lot where the old Grit Mill is located from milepost 4.3-4.5, and realigning Wasatch Resort Road. Working hours are Monday through Friday during daylight. Travelers should expect occasional one-way flagging operations and moderate delays.
Construction Time frame: August-October 2020

5) S.R. 210: RACS Installation

UDOT will be installing 12 remote avalanche control system (RACS) towers in Little Cottonwood Canyon in the Toledo and Emma Ridge areas. This will not affect the roadway, however, construction crews, helicopters, equipment and rockfall may be present at any time. Little Cottonwood Canyon travelers should avoid active work areas and use caution when traveling in the areas shown on the map below.
Construction Time frame: June 1-October 2020

6) S.R. 190: Paving, PIN 17248

UDOT will be paving a 3-inch mill/fill from milepost 8 to Brighton Resort and up to Guardsman Pass. Working hours are Monday through Thursday during daylight. Travelers should expect lane closures, restrictions for cyclists/pedestrians and moderate delays.
Construction Time frame: June 24-September 2020

[Project website](#)

7) S.R. 190: Pedestrian Crossing, PIN: 17207

An addition of a signalized pedestrian crossing near milepost 10/Cardiff Fork. Travelers should expect crews in the road and on the shoulder, occasional lane closures and minimal delays. Those using the parking area near the trailhead should expect equipment in the area.
Construction Time frame: July-August 2020

Other, non-UDOT affiliated project:

This non-UDOT affiliated project is utility-related construction. Please contact Dominion Energy at permits@dominionenergy.com for more information.

8) S.R. 210: Dominion Energy Pipeline

A pipeline will be installed, going from Snowbird Entry 4 to Albion Basin Road. This open trench alignment will be under the outside edge of the uphill (eastbound) lane. Travelers should expect detours.
Construction Time frame: Summer 2020
